

COMPANY PROFILE

tech-hub.africa

WHO WE ARE

Africa Tech Hub is an **enterprise transformation** and **executive education** firm. We work with organisations to **diagnose** the constraints limiting performance and growth, **design** integrated responses, and **build the capability** required to deliver lasting improvement.

Our work brings together **strategy, governance, operating systems, performance, people, technology and market execution.**

We work alongside boards, executive teams and institutional leaders to turn priorities into clear decisions, accountable execution and stronger organisational capability.

OUR PURPOSE & PASSION

Vision

To enable high-performing, resilient organisations across Africa.

Mission

To help organisations diagnose performance constraints, design integrated transformation solutions and build the leadership and capability required to sustain results.

OUR CORE VALUES

Integrity

We give honest advice,
grounded in evidence.

Mastery

We commit to excellence in
all services and outcomes.

Progress

We turn learning and
insight into practical
improvement.

Agility

We adapt our approach
as needs change.

Client Focus

We define success
around the client's
priorities.

Transformation

We build stronger people
and systems.

WHAT WE DO

Enterprise Diagnosis & Organisational Design

Identify the constraints affecting structures, roles, workflows and capability.

Outputs include organisational designs, role profiles, workflow maps and prioritised transformation roadmaps.

Strategy Execution & Performance

Translate priorities into accountable work, measures and management routines.

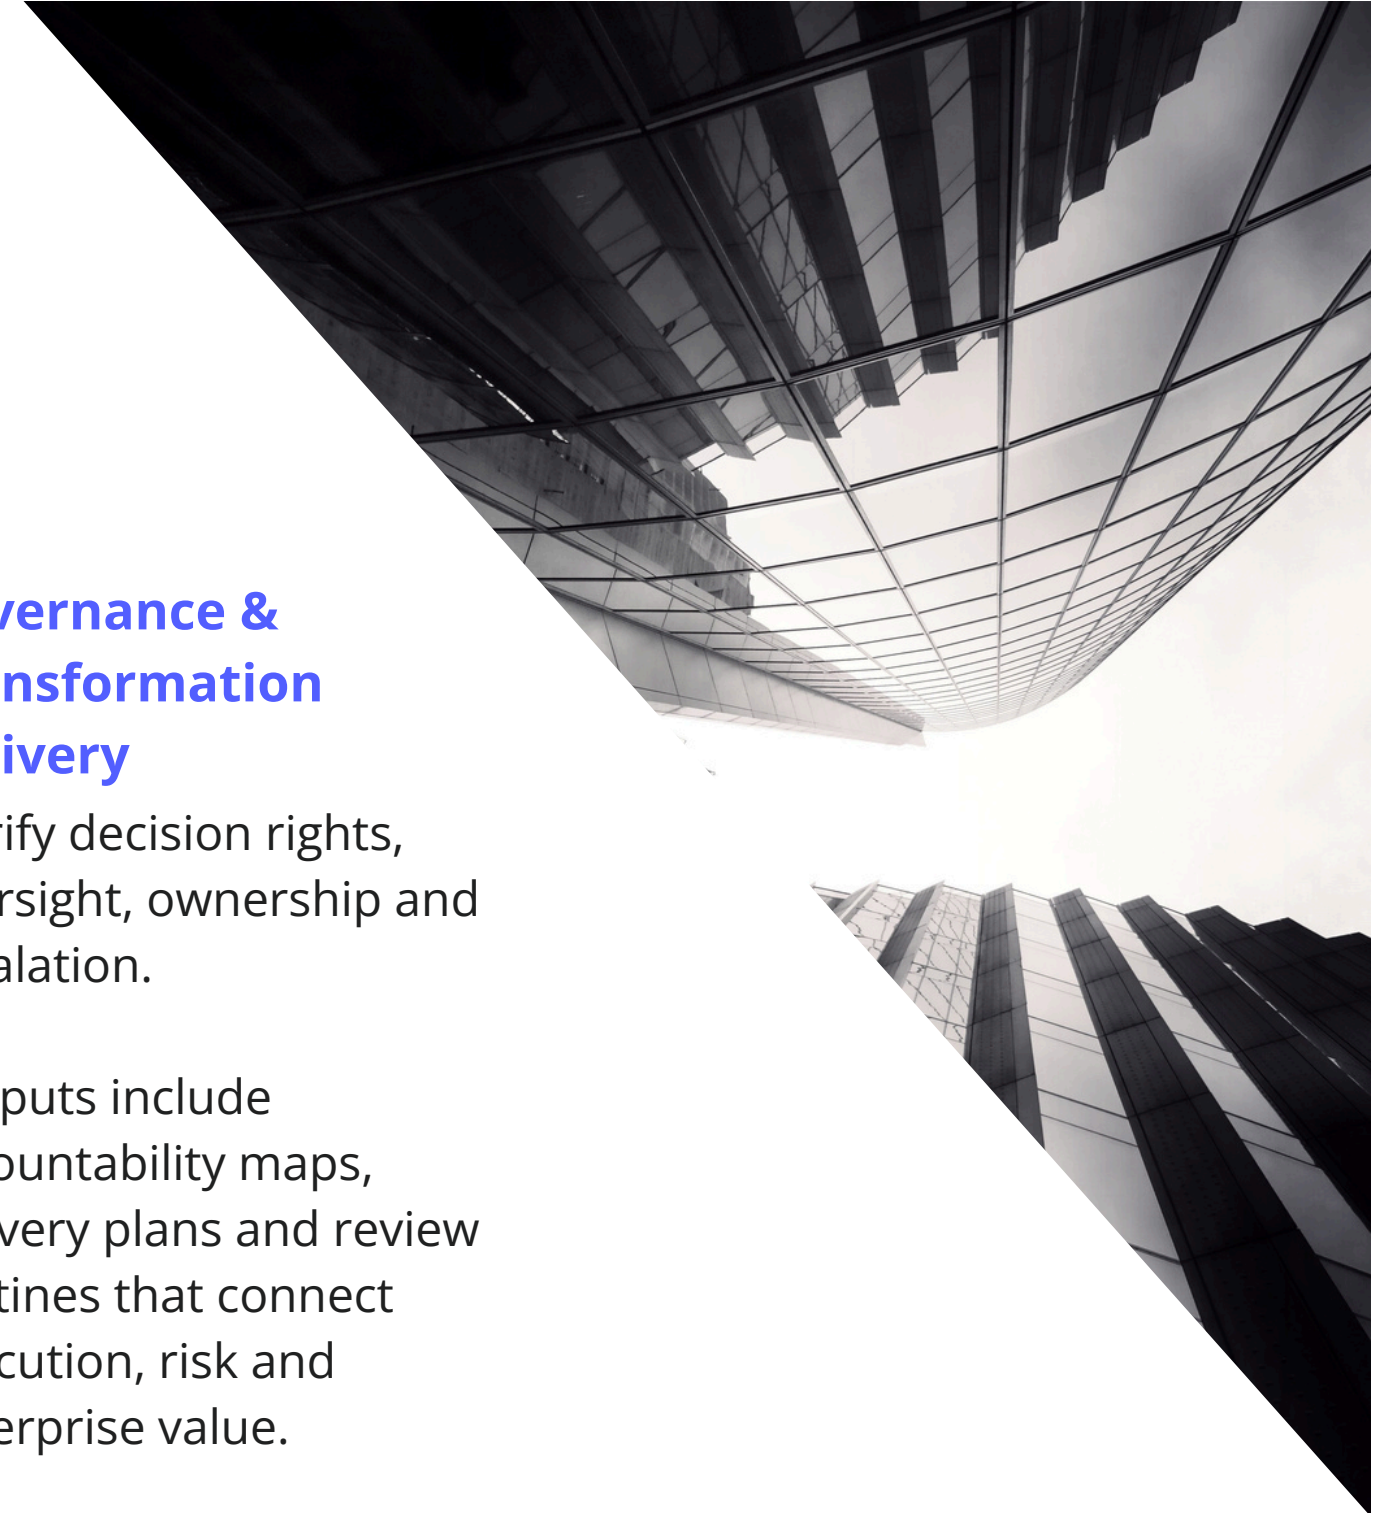

Outputs include KPI and OKR frameworks, performance standards, dashboards and execution plans.

Governance & Transformation Delivery

Clarify decision rights, oversight, ownership and escalation.

Outputs include accountability maps, delivery plans and review routines that connect execution, risk and enterprise value.

WHAT WE DO

People, Capability & Leadership

Align people, skills and leadership practices with the organisation's strategy.

Outputs include competency frameworks, workforce plans, HR systems, leadership development and tailored executive education.

AI, Technology & Analytics

Identify high-value use cases and redesign work and decisions around them.

Outputs include digital roadmaps, analytics requirements, governance, adoption plans and capability development.

Market Development & Stakeholder Engagement

Translate organisational capability into stronger customer, market and stakeholder outcomes.

Outputs include value propositions, mobilisation and communication plans, and measures of demand, conversion and retention across direct and digital channels.

HOW WE WORK

Diagnose

Define the desired outcome and test the underlying constraints.

Design

Design the connected changes required across the enterprise.

Prioritise

Sequence interventions by value, resources, risk and dependencies.

Enable

Equip leaders and teams with the skills, tools and ownership to deliver.

Govern

Review evidence, resolve barriers and hold owners accountable.

Sustain

Embed the capability and routines that sustain improvement.
